- Suryaansh Rathinam

Skilled in coding in a variety of programming languages. Always looking to work on something new and expand my skill set. Experienced in working on a variety of both independent and team projects.

PROJECTS

Datagrad
Co-founder

Co-Founded the organization and led a team of 4 individuals to efficiently create and deploy this platform working in the domains of both Web-Development (React + Flask) and Machine Learning (Python), aiming to bridge the gap between top MOOCs like Coursera, Udacity, EdX, and students eager to learn new skills.

Decrypt
Full stack Web Developer

Worked as a Full-Stack developer, using MERN Stack, to build the website for the Decrypt Competition conducted by IEEE SBM. Worked with a team of 5 developers to build this website for the competition with clean, appealing UI and sleek animations. Over 200 people registered for the competition and enjoyed a smooth experience on the website over the course of the competition.
